Technical Features (Band width 100 mm)

Power Supply:	230 VAC · 50 Hz · 7VA/24VAC
Capacity:	Max. 21 litres/oil pr. hour
Max temp. *:	90°C / 194°F (bath temperature)
pH working area:	pH 0-14
Dimensions & weight:	210 x 220 x 125 mm · 3,0 kg.

Outlet:	Ø34 x 25 mm
Band lengths (mm.):	600 – 2000 mm (100 mm interval).

Special bands for high temperatures, made without overlap. For other lengths, please contact your distributor or the factory.

Band calculation formula: $(H + 150) \times 2 = \text{Band length}$
See band calculation guide, and use formula above.

*Max temperature in pH neutral fluids. I strong acids/alkalis keep below 80°C/176°F

Oil Buster is a compact oil skimmer with an very high capacity which makes it ideal for large industrial baths, washing machines, sumps and pits where large amounts of oil must be removed. The unique design and axle tightening allows the skimmer to work in the most difficult places with high temperatures and strong acids or alkalis.

Because of these unique features this skimmer can be used almost anywhere where undesired oils must be removed. Besides from the great features of the skimmer, it is also made in a beautiful design and compact design, which does not only make it look good, but also makes it easy to install.

The skimmer is not just a high capacity skimmer, but also a fully balanced tool to make the most efficient oil removal. The skimmer is designed like all our other oil skimmers, where focus is kept on collecting oil – and only oil! This means the skimmer is, in baths without emulgations, capable of removing 99% of the surface oils, without picking up and water.

If you need a skimmer to remove large amounts of oil, or if the working conditions are the toughest, this skimmer is the best choice you could make.
